

California OES Weather Threat Briefing

Friday, June 26, 2020
9:00 AM PDT

Day 1 (Friday): Hot and dry conditions will continue today across the interior portions of the state, especially across the northern Sacramento Valley. Isolated thunderstorms are possible today across higher elevations of southern CA. Most of the state will see continued dry conditions and breezy winds at times, which will lead to elevated fire weather concerns.

WEATHER KEY POINTS

06/26/20 - 07/02/20

Friday - Saturday

- Hot and dry conditions will continue today across the interior portions of the state, especially across the northern Sacramento Valley where highs of 110 will be common.
- Isolated thunderstorms are possible today across higher elevations of southern CA.
- Most of the state will see continued dry conditions and breezy winds at times, which will lead to elevated fire weather concerns, with the strongest of these gusty winds expected in and around the Antelope Valley.

Sunday-Thursday

- Strong winds are likely across the interior portions of southern CA and the eastern Sierras for Sunday and Monday.
- Fire Weather Watches have been issued for these portions of the state for Sunday and Monday.
- Cooler temperatures can also be expected during these couple of days ahead of a slight warming trend by the middle of next week.
